Supported Versions of Ignite-UX

Introduction

This document provides a matrix listing the supported and end of support (EOS) versions of Ignite-UX. It is intended to assist you in determining whether the versions of Ignite-UX you are using are currently supported by HP and the level of support being provided.

Support Matrix for Ignite-UX Releases

The following explanations are intended to help you interpret the data in the support matrix:

- The release identifiers for HP-UX 11i used in the support matrix are:

Release Name	Release Identifier	Supported Processor Architecture
HP-UX 11i v1	B.11.11	PA-RISC
HP-UX 11i v1.5	B.11.20	Intel® Itanium®
HP-UX 11i v1.6	B.11.22	Intel Itanium
HP-UX 11i v2	B.11.23	Intel Itanium PA-RISC
HP-UX 11i v3	B.11.31	Intel Itanium PA-RISC

- Abbreviations:
  - OE stands for Operating Environment.
  - AR stands for Application Release.
  - EOS stands for End of Support.
- HP-UX EOS dates are taken from http://www.hp.com/softwarereleases/releases-media2/history/slide2.html.
  - EOS occurs at the end of the month indicated.
  - The red color indicates the Ignite-UX version is already past EOS and is out of support.
  - Although not explicitly mentioned in the B versions, HP-UX 10.20 EOS is July 2003 without an extended 10.20 support contract.
- EOS does not mean customers will not be helped. Customers with recovery tapes created before the EOS date will be provided best effort assistance in helping to recover a system in the event of a failure to recover. However, new problems will not be investigated on versions already past EOS. Ignite-UX servers with network recovery or installation problems must be upgraded to a supported version of Ignite-UX before any new problem is investigated.
