TECHNICAL BULLETIN

Summa Four, Inc., 25 Sundial Avenue, Manchester, New Hampshire 03103
(603) 625-4050

Technical Bulletin #: TM-C1-0155A
Date Issued: April 18, 1997
Audience: Japanese ISDN Customers Upgrading to V4.0 FSR02
Product(s) Affected: Generic Database
Distribution: ___- Critical   _X_- Standard   ___- Special

Purpose of Bulletin

When upgrading to Generic version V4.0 FSR02, the mandatory data base conversion replaces the NTTPRI card entries in your current data base with PRI/N card entries.

Corrective Action

After completing the data base conversion, delete the PRI/N entries from the database and resource groups, and re-enter them with the appropriate NTTPRI card entries.

Refer to the *Generic V4.0 FSR02 Release Notes* for instructions on how to convert the data base. Refer to the *System Administrator's Guide* for instructions on how to modify the card entries and resource groups. If you have questions, contact Summa Four Technical Support at 1-800-9SUMMA4.
