Cisco IOS Profiled Releases 12.1(23)E, 12.2(18)SXD2, 12.3(8)T5, and 12.3(12) System Testing for Enterprise Financial Customers

Version History

Version Number	Date	Notes
1	April 30, 2005	This document was created.

The nEverest program is a quality initiative that focuses on satisfying customer requirements by coordinating system-level and reliability testing of Cisco IOS releases under "real world" conditions. The nEverest testing uses the following five profiles, the designs of which are based solely on customer requirements:

- Enterprise Global

- Enterprise Financial

- Service Provider/IP backbone

- Service Provider/MPLS backbone

- Broadband

Cisco IOS Profiled Releases 12.1(23)E, 12.2(18)SXD2, 12.3(8)T5, and 12.3(12) System Testing for Enterprise Financial Customers provides a summary of the system-level and reliability testing completed atop the Enterprise Financial profile for the specified release. If you would like to see the contents of this document and you are a Cisco customer, it is available at the following URL:

http://www.cisco.com/systemtest/ef_ph4/EntFin4.pdf

If you are a Cisco employee and would like to see supplementary information related to this testing, please go to the documentation page of the nEverest website and select the appropriate profiled release under the Enterprise Financial profile. The nEverest website can be found in CEC by searching on the term "nEverest."
